

Pyramid.Net Cloud Vault

Backup any data, anytime, anywhere.

PYRAMID.NET

Welcome to Pyramid.Net Cloud Vault. Back up any data, any time, to any destination. Back up your emails daily to the Internet, back up your whole system to a local USB drive weekly, or back up MyDocuments to the network server hourly.

Select from the four wizards on the right to configure your backups, or restore data that you have previously backed up to the Internet or locally.

Show wizards on start-up (otherwise, start up in advanced mode)

Pyramid.Net Cloud Vault™ with LiveProtect. Backup any data, any time, to any destination

Pyramid.Net gives you the flexibility and power to create a backup that will meet your need. Backup your MS Outlook daily to 6 global datacenters. Backup your entire computer to a USB drive nightly or backup My Documents to your iPod each hour or engage LiveProtect™ to have Pyramid.Net watch your files and provide continuous real-time data protection. You save it – we back it up offsite invisibly and automatically, keeping an unlimited version history that lets you roll-back to any point in time.

Pyramid.Net provides Big-Business IT best-practice for the little guy – true multi-destination, multi-schedule backup that can be adapted to meet your needs but at consumer price. Pyramid.Net is software as a service billed at a low monthly subscription. A basic annual subscription costs less than most stand-alone backup software packages – let alone a tape-drive or an external hard-drive.

Local Backup

Online backup is invaluable but simply cannot protect your entire computer. Using Pyramid.Net Universal backup system, you can backup your entire computer, open/locked files and operating system files to any local medium, whether it is an external USB drive, a local network location, a USB stick or an iPod.

Unlimited Number of Computers

Backup as many computers as you like using one account. Over 60% of households have more than one computer, and Pyramid.Net Universal allows you to backup and recover from all of your machines. Backup your home, office and laptop computers all on one account for easy access to ALL your files from anywhere.

Unlimited Versions & Powerful Recovery

Keep an unlimited version history of all your files – roll back your books to last year's tax records if you wish. Use our time machine feature to go back to the date you want to restore and recover that snapshot of files & versions.

Fully Flexible Scheduling

Monthly, weekly, daily, hourly or instant backup.

LiveProtect™

Engage Pyramid.Net LiveProtect™ to have Pyramid.Net back up files as soon as a change is detected.

Intelligent File Filters

Tell Pyramid.Net Online Backup to watch your My Documents folder but to ignore all *.mp3's and *.avi's. Alternatively, tell Pyramid.Net to only protect *.doc, and *.xls. Either use our pre-sets, or set your own inclusion/exclusion mask.

Enterprise Compression & Transfer Systems

Pyramid.Net compression system only backs up changed files and then only the changed 1's and 0's are transferred. On a 500 MB database (MYOB/Intuit/Turbo Tax) the daily transfer can be as small as 5 KB. Our transfer system is enterprise grade, meaning that large file transfers are resumed at the KB of interruption, and does not start at the beginning like most online backup systems.

Global Roaming Access to Your Files

Because your data is being backed up daily to the Pyramid.Net Backup Server Grid - you can access your data anywhere in the world using just a web-browser. Never be without that critical file again.

One-Click File & Folder Sharing

From inside the Online Recovery Interface you can share your files with anyone to an email address. Never have a large attachment bounce again. Just share your backed-up data with your friends and colleagues. Or if you are a home user – simply share photos or videos.

Archiving

Unlike other online backup systems, we do not delete the file from your backup just because you delete the file from your computer. Over 80% of data loss occurs due to accidental deletion. Rest assured, we keep every version of every file forever. Unless you choose to remove it.

System Requirements	
 Windows 7® , Windows Vista®	300 Mhz processor 30 MB hard drive space High-speed Internet connection recommended Download Size: 20 MB
 Windows XP®	
 Windows Server 2003®	
 Windows Server 2008®
